

10 reasons to upgrade to the latest Infor Fashion PLM

The latest release of Infor® Fashion PLM offers advanced tools that enable you to work faster, more flexibly, and more efficiently. In addition to our formidable fashion credentials and customer base, here are 10 reasons your company should upgrade now:

1. Industry-leading user experience

All your teams—design, development, commercial, and suppliers—can become more productive with our intuitive user interface. Enjoy a task-oriented homepage that’s easy to customize with drag-and-drop capabilities.

2. Bi-directional Adobe plug-ins

Your graphic designers, who live and breathe inside Adobe® applications, won’t need to lose their train of thought. Our bi-directional plugin improves upon other solutions to enable them to quickly transfer updates and new designs seamlessly to Infor Fashion PLM.

3. Intuitive planning & development

Our current version offers advanced capabilities for concurrent merchandise planning and product design. Easily create novel styles or add existing ones to an existing line plan.

4. Time-saving “mass” functionality

Instead of starting from scratch, your team can use details from existing styles. Increase efficiency with “mass” creation, updating, deletion, and more.

5. Easy sample order generation

Now you can generate and finalize sample orders from within Infor Fashion PLM. Divert the time you save to more creative, proactive tasks.

6. Get to market faster with 24/7 vendor collaboration

Get out of the waiting game and be more responsive when changing design specifications for all events—planned or otherwise.

7. Graphical drilldown and critical path tracking

Managers and users alike can have role-based overviews in a pleasing graphical interface. Dive deep into your calendars and down to specific styles to preempt delays in a timely manner.

8. Built-in analytics & reporting

Enjoy a lower total cost of ownership by utilizing the advanced analysis and automated reports in Infor Fashion PLM.

9. Training time slashed

User adoption and training are faster with the intuitive, graphical user experience of Infor Fashion PLM. This also reduces implementation effort and time to value.

10. Integration that accelerates business

Our flexible, advanced integration capabilities will connect your systems from concept to consumer. Fashion PLM also comes with tools to support data migration from legacy systems.

About Infor

Infor builds beautiful business applications with last mile functionality and scientific insights for select industries delivered as a cloud service. With 14,000 employees and customers in more than 200 countries and territories, Infor automates critical processes for industries including healthcare, manufacturing, fashion, wholesale distribution, hospitality, retail, and public sector. Infor software helps eliminate the need for costly customization through embedded deep industry domain expertise. Headquartered in New York City, Infor is also home to one of the largest creative agencies in Manhattan, Hook & Loop, focused on delivering a user experience that is fun and engaging. Infor deploys its cloud applications primarily on the Amazon Web Services cloud and open source platforms. To learn more about Infor, please visit www.infor.com.
